

## **Development Control Plan**

### **Temporary Workers Accommodation**

### **Submissions – Volume 2**

**EXECUTIVE WORKING COPY**

General Manager

Mid-western Regional Council

I object to the proposed site of the "Temporary Workers Accommodation camp" situated 1.5km to Town.

The Development Control Plan [DCP] for the "Temporary Workers Accommodation" needs to be revised so that a major infrastructure like this proposal by the MAC group, located so close to a Community which relies so heavily on Tourism cannot proceed.

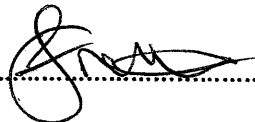

To attempt to accommodate 400 Beds (which in essence is a 20% increase to the population) of Gulgong, places undue strain on local resources, (with particular reference to medical facilities and sewerage system) which in turn imposes restrictions on any further development in the town at the present time.

A "Temporary Workers Accommodation camp" of this size could possibly be situated at the mines' sites with the more suitable introduction of smaller sites (eg.10-50) being made available throughout the mid-western region thus injecting some money back into the community.

I agree to the above.

General Manager

Mid-western Regional Council

I object to the proposed site of the "Temporary Workers Accommodation camp" situated 1.5km to Town.

The Development Control Plan [DCP] for the "Temporary Workers Accommodation" needs to be revised so that a major infrastructure like this proposal by the MAC group, located so close to a Community which relies so heavily on Tourism cannot proceed.

To attempt to accommodate 400 Beds (which in essence is a 20% increase to the population) of Gulgong, places undue strain on local resources, (with particular reference to medical facilities and sewerage system) which in turn imposes restrictions on any further development in the town at the present time.

A "Temporary Workers Accommodation camp" of this size could possibly be situated at the mines' sites with the more suitable introduction of smaller sites (eg.10-50) being made available throughout the mid-western region thus injecting some money back into the community.

I agree to the above.

The Development Control Plan [DCP] for the "Temporary Workers Accommodation" needs to be revised so that a major infrastructure like this proposal by the MAC group, located so close to a Community which relies so heavily on Tourism cannot proceed.

To attempt to accommodate 400 Beds (which in essence is a 20% increase to the population) of Gulgong, places undue strain on local resources, (with particular reference to medical facilities and sewerage system) which in turn imposes restrictions on any further development in the town at the present time.

A "Temporary Workers Accommodation camp" of this size could possibly be situated at the mines' sites with the more suitable introduction of smaller sites (eg.10-50) being made available throughout the mid-western region thus injecting some money back into the community.

I agree to the above.

MUDGEES SHIRE COUNCIL

We, the undersigned, vehemently oppose the construction of a miners' village at Blacklead Gulgong and state the following in support of our opposition:

- Compromised mental, physical and environmental wellbeing of residents.
- Compromised health and safety of Cope Road users.
- Loss of cultural heritage and community cohesion.
- Loss of sense of place.
- Undue stress upon water resources.
- Undue stress upon waste removal.
- Undue stress upon sewerage services.
- Lack of appropriate medical facilities.
- Lack of ambulance and policing services.
- Inadequate parking spaces and narrow streets.
- Devaluation of land and property.
- Diminished tourism capacity.
- Probable alcohol related antisocial behaviour.
- Potential hazards involving increased rail line use and pedestrian activity.
- Lack of foresight to determine long term impacts upon the community.

MID-WESTERN REGIONAL COUNCIL  
 RECORDS  
 RECEIVED  
 31 OCT 2011  
 SCANNED  
 REGISTERED

We the undersigned would like to bring this issue to your attention. Being our objection of the miners camp located 1.5km from Gulgong on the corner of Cope rd and Blacklead lane housing 400 miners. This type of establishment will cause major problems for the Township of Gulgong.
